

(a) Overall Method

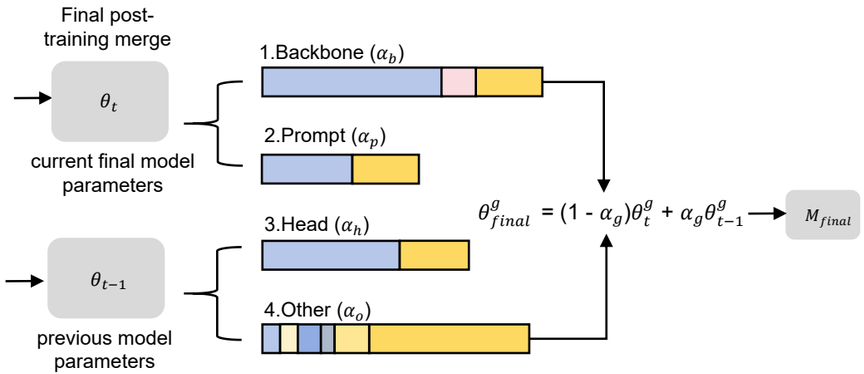

(b) CSAD: Cross-modal Structure Alignment and Discrimination

Training Objective $L_{total} = L_{id} + L_{tri} + \lambda_{align} L_{align} + \lambda_{rel} L_{rel} + \lambda_{pdr} \omega(e) L_{pdr}$ $\lambda_{pdr} L_{pdr}$ = 0 for t = 1; PDRC active for t ≥ 2

(c) PDRC: Progressive Distribution-Relation Consolidation

GSPC is not a loss;it is applied after the final task

(d) GSPC: Group-wise Stability-Plasticity Consolidation
